SUMMARY

Fresh graduate in Information and Communication Technology with 2+ years of hands-on experience building web and mobile applications using Laravel, Vue.js, React, and Flutter. Proven track record delivering end-to-end projects across multiple industries in Indonesia and Malaysia. Passionate about writing clean, scalable code and creating user-centered digital solutions.

EXPERIENCE

Fullstack Developer (Intern)

Jan 2026 – August 2026

Xspec Technology — Selangor, Malaysia

- Migrated company website from WordPress to fully custom native PHP codebase, eliminating plugin dependencies and improving page load performance
- Assisted in setting up and configuring EyeDetect software, including network and system connectivity setup to ensure stable deployment
- Diagnosed and resolved hardware issues including laptop repairs and peripheral troubleshooting for internal team members
- Produced and edited video content for company presentations and internal communications

Fullstack Developer (Full-Time)

Apr 2025 – Nov 2025

Guepedia.com — Depok, Indonesia

- Architected and developed full-featured web applications using React and Vue.js, managing the complete development lifecycle from planning to deployment
- Built and launched a cross-platform mobile application using Flutter, ensuring consistent user experience across Android and iOS platforms
- Maintained and optimized multiple production websites and applications, performing bug fixes, performance tuning, and feature updates
- Collaborated with the product team to translate business requirements into scalable technical solutions

Website Developer (Freelance)

Dec 2024 – Jan 2025

PT Jalan Sukses Amanah — Remote

- Designed and developed a fully custom Content Management System (CMS) from scratch using native PHP and MySQL, tailored to client's specific business workflow
- Built responsive and dynamic frontend interfaces using native CSS, ensuring cross-browser compatibility and smooth user experience
- Managed the full project lifecycle independently — from client requirement gathering and system design through to testing and final deployment

Website Developer (Freelance)

Sep 2024 – Dec 2024

Lumbung Stroberi — Remote

- Developed a product listing and e-commerce website using PHP and Bootstrap, enabling the client to manage and showcase products online
- Optimized database queries and backend logic, resulting in significant improvements to overall website loading speed and performance
- Designed and implemented responsive frontend layouts using Bootstrap, improving usability across mobile and desktop devices

Fullstack Developer (Intern)

Apr 2024 – Aug 2024

PT Tigac Global Ventura — Jakarta, Indonesia

- Developed and integrated frontend and backend features using Laravel, PHP, aapanel, and Git within a professional agile team environment
- Ensured seamless integration between client-facing interfaces and server-side logic, contributing to a stable and maintainable codebase
- Actively participated in code reviews and sprint planning, providing constructive feedback and continuously improving code quality

Frontend Developer (PBI)

Mar 2024

Core Initiative x Rakamin Academy — Remote, Indonesia

- Developed and styled responsive website frontend using Vue.js under a structured professional mentorship program
- Applied industry-standard frontend best practices including component-based architecture, state management, and responsive design principles

Teaching Assistant

Jul 2023

Universitas Indonesia — Depok, Indonesia

- Assisted in designing and structuring training materials for the Advance Office Training program targeted at Human Resources professionals
- Delivered technical support to participants during sessions and collaborated closely with lecturers to maintain high-quality event execution

EDUCATION

Bachelor of Information and Communication Technology (BICT)
